Web Development Projects

MedKorea

Full Stack Group Project - wcoding

- Crafted a tourist-centric website for accessing English-speaking healthcare services in Korea.

- Utilized github, figma, and trello for collaboration

- Facilitated setup and organization of group project files, initiating project activities

- Led team efforts, tactfully delegating tasks for project success.

- Enhanced website presentation with HTML & CSS, crafting landing pages, navbar, and footer.

- Implemented doctor search on Korean medical tourism site with JS/Fetch for dynamic data retrieval & detailed view on click (front-end).

- Enabled secure user authentication (register, login, admin) & email functionality with Flask (Python) backend

- Executed SQL skills in MariaDB database operations.

Nomadica

Personal Project - Travel Blog

- Developed a travel blog to hone and enhance CSS skills

- Created using HTML and CSS only

- Applied responsive design for optimal user experience on desktop and mobile.

Ninagara

Front–End Group Project - wcoding

- Developed a collaborative travel platform to simplify trip planning and discovery.

- We utilized OneDrive for efficient editing and collaboration.

- Contributed to HTML structure and JavaScript functionality.

- Created cohesive site design using CSS and documented styles and guidelines for team use.

Previous Experience

Hospitality Industry Professional

2016 - 2023

- Fostered positive interactions with guests and colleagues, ensuring memorable experiences.

- Engaged in active collaboration with my team, promoting synergy and achieving collective goals.

- Addressed guest concerns with agility, ensuring issues were resolved promptly and consistently exceeded expectations
